NE of the curious sights at Fulton Mar ket just now is a big marble tank at Mr. Blackford's stand filled with lively little black wigglers from an inch to an inch and a half long. These are the five thousand young German carp

which came yesterday from the United States Fish Commission at Washington for free distribution in this vicinity. Twenty of the fish will be given to any one upon appli-

the fish will be given to any one upon application, if they are desired for the purpose of stocking ponds.

"I have already received over one hundred and fifty applications," said Commissioner Blackford this morning, "and will send the fish off to-day. Most of them go by express. This lot is part of a carload that was sent to Eastern States in one of the commission's aquarium cars, built especially for the purpose. The rest go on to Boston and the New England States. About 3,000,000 carp are distributed about this time every year by the commission.

tributed about this time every year by the commission.

"They are hatched in the Government stock ponds at Washington, and all of this lot is less than six months old. Five hundred of them are blue carp, a new variety brought over from Germany about two years ago. They grow a little faster than the others. Carp are a very hardy fish and easy to raise, but the quality of the fiesh is rather inferior. They are mostly eaten by Germans. It takes five or six years for a carp to reach its full growth, when it sometimes weighs eighteen or nineteen pounds. It resembles an American sucker more than anything else."

"Do you anticipate any difficulty in disposing of your entire consignment?"

"Not the slightest. The demand is always far ahead of the supply."

UMBRELLA HANDLES.

Boxwood handles are not to be despised. A bird's head in ivory with a bill as long as a milliner's, is fetching.

Oxydized silver, wrought into fanciful designs, is one of the neatest styles. Hazel wood, with a elephant head, gives an attractive hold to a banker's clerk. Some youthful bloods prefer the stick of British oak and a buck-horn handle.

The fastidious young man about town likes a big Japanese handle, carved. It is very

just as likely as not to take a maple stick and gold handle. A beautiful natural stick is the German weichzel, a smooth, rich cherry, with neat little knots on it and deliciously fragrant. Young ladies with a willowy, Southern grace, should select a palmetto stick from the 1sthumus. It is dark, smooth and knotty. Undertakers eye the rosewood stick with the silver handle as an umbrella made for the profession. It looks like an offshoot from a casket.

Columbia undergraduates think a Whanzee stick, or one of partridge wood, which is as hard as Bessemer steel, is the thing for a col-

for handle. Something for a young widow is an unpolished ebony, without carving or mounting of any kind. It is as sombre as a hearse and far more elegant.

A good handle for believers in the late Scotch cutter (she was very late, you know.) is the thistle-root. It is tough, light, and of a bleached, taffy color.

If you are young and dudish, what about an orange-wood handle, a creamy white, something like a meerschaum after a first smoke, and smooth as satin?

For a millionaire and fifty years, nothing harmonizes better than a snake stick, with a hammered gold cap. Snake wood is as hard as a problem in the higher mathematics, and has beautiful dark stripes running around it. Snake wood comes from Grevill, Ill.

EFFORTS TO HAVE MRS. POTTER APPEAR IN A NEW PLAY NEXT WEEK.

were discussed by Mrs. James Brown Potter and her manager yesterday in regard to the lady's season at the Fifth Avenue Theatre. that

They had supposed "Mlle. de Bressier" would run two weeks, but the public do not seem to like it. It serves to conceal whatever talent Mrs. Potter may possess. She is sadly handicapped by it. On Tuesday night the receipts

were good, but by no means extraordinary. On Wednesday night only two boxes were occupied, while about three-quarters of the lower part of the house and one-half of the lower part of the house and one-half of the dress circle were populated. Both Mrs. Potter and Mr. Miner have come to the conclusion that a change is necessary. They have no new play but "Loyal Love," which Mr. Miner saw in London, and liked no more than did the Londoners. However, all the energies of the management—they are both vigorous and numerous—will, it is said, be exerted to make some change next week if possible. Several theatrical prophets said yesterday that they believed Mrs. Potter would make a hit in a good play.

The arrangements, to keep Bronson Howard's wonderfully successful play "The Henrietta" at the Union Square Theatre until the last week in March are now completed. When they have brought their long engagement to an end Messrs. Robson and Crane will take "The Henrietta" to the Hollis Street Theatre, Boston, where they will open the first week in April. They will then go to Philadelphia and Chicago. The managers of the different theatres where Robson and Crane were booked to appear before they knew they would remain at the Union Square Theatre were offered in exchange Steele Mackaye's play "Anarchy." It has not been generally accepted, however.

Rosina Vokes and her company have not met with the same success in San Francisco that they had here. The loss of that amusing little comedian, Weedon Grossmith, and one or two other important people, injured the business of the company in San Francisco, where they opened last Monday night.

Henry E. Abbey is looking for bevies of pretty girls to appear in "School" in the school-room scene. This play will be produced at Wallack's in a couple of weeks, when "Caste," which is still drawing big houses, will be withdrawn.

Henry E. Dixey plays next week in Buffalo Henry E. Dixey plays next week in Buffalo. Immediately after the close of his engagement he will make a quick jump—this is the strical parlance—to San Francisco with his company and his Rice. He will appear in that city the Monday following his arrival there. The Dixey engagement in California is looked forward to with a great deal of interest. It is thought that Dixey will make a great deal of money, in view of the fact that burlesque of every description is all the rage at the Golden Gate.

sary and refits the music-box with popular tunes. But just at this season of the year no hand-organs are heard, because of late years musical tours with the hand-organ are made almost entirely by the children of sunny Italy, and these people are now engaged in the more genteel and much easier employment of selling chestnuts.

A large part of the Italians who come to this country are the owners of organs, but many forsake them if other work can be found, really preferring hard labor to the grinding of organs; but others never did, and probably never will, do anything else.

Some twenty-five years ago, during the war times and for a few years afterwards, tunegrinding was at its height, for in those times crippled soldiers with large families and small pensions could find but little else to do, and so of necessity took to grinding out the then popular war songs. But since that time there has been a gradual but steady falling off in the number of grinders and the rendering of popular tunes at 6 a. M. has been growing beautifully less, for those of the soldiers who are not dead have found other means by which to fight the wolf.

[New Fork Correspondence Milwaukee Sentinel.]
The most interesting relic of old New York, perhaps, is Black Sam's or Fraunces' Tavern, on the corner of Pearl and Broad streets. It was here that Washington was lodged after the evacuation evacuation by the British, and here that his memorable farewell to his officers was spoken. The building is a plain brick structure, five stories high, though it is not improbable that the two upper stories have been added since the present century came in, the great thickness of the honest century came in, the great thickness of the honest old walls making such an addition easily possible. The house was built about 1730 by the DeLancey family, and Samuel Fraunces opened it in 1769 as an ion. It was the Saturday night rendezvous of a gathering of choice spirits, who called themselves the Social Club and remained open throughout the war. Black Sam, though known to be on the Liberty side, being a favorite of the Tories as well. It is now kept by one Jacob Eugell, who is very proud of the history of the old place, and looks with secrn on the claims of spurious Washington's headquarters elsewhere. The dining-room where the last tosast was drank and the last handclasp given before Washington took boat at Whitehall to lay down his commission before Congress, is on the second floor; a low-ceiled room with deep window seals that would put a modern builder's finnsy walls to shame. A portrait of Washington hangs in it and long tables are ranged up and down its length. memorable farewell to his officers was spoken.

Black Sam's Famous Tavers.

A Boston man who, until he was forty, lived an economic, hardworking life, and one which was both happy and useful, had the misfortune at that time to inherit from a relative a fortune of some millions. He was instantly overwhelmed with importunities from all sides. Gifted with an scately portunities from all sides. Gifted with an acutely sensitive New England conscience, he was not only anxious to do good with his wealth, but he was almost morbidly afraid that through ignorance or carelessness he should do harm with it. He investigated with the most painful care the cases presented to him, and he literally agonized over the things he desired to do, that he feared to do and those that he was urged to do. Two years of this worry killed him. His physician said afterwards that the certificate, to be securate, should have been filled out to read, "Died of his money," and the statement would have been literally true. literally true.

After that first visit there were plenty of excuses for going over to Boskyne Rectory. It was wonderful what a number of reasons he unearthed of the most impossible nature. One day he had found a botanical specimen hitherto unknown in the neighborhood; another day he wanted to consult Mr. Rayne about the ventilation of some new schools. He always had an excellent pretext for coming, and being a pleasant, genial man met with a warm welcome. Sometimes he rode, and sometimes came in a pony-carriage, with the children, in which case Althea, still half a child herself, was delighted. It really seemed as though fate favored him, for, on one of those visits with the girls, the conver-

"What prevents anybody from eating half a dollar's worth and getting a check for a sandwich?" an EVENING WORLD reporter asked of a young man who was feverishly dealing out apple dumplings.

"They do. We lose about \$20 a day. But they're likely to be caught. There are several detectives in the room at this time, and they drop on a fellow when they see him playing that game."

"What do the men say when they are caught?"

"Oh, they'll tell you they thought the whole thing was 10 cents. If they kick and won't pay, why the policeman out there is

How comfortable the room looked! There, on her father's desk, which was never allowed to be touched by any sacrilegious duster. Althea had placed a nosegay—fresh, glowing, audacious—amongst the dingy papers. She herself had flowers in her belt, sweet-scented Malmaison roses; and as she leaned over the table some of the petals fell upon the floor.

Canon Charteris was unusually lenient that day; he found no fault with her for wrong tenses, nor did he even wince at false quantities. This was inconsistent of him; but after all he was but human. Then he found the place for her to read, and listened—in an absent fashion, to be sure—to her sweet unconscious voice.

Presently came a long word. Althea stum-
